# WE ARE HERE FOR **YOU** EVERY STEP OF THE WAY

## WELCOME TO **SMOKEFREE SOUTH GLOUCESTERSHIRE**

Many smokers want to quit but aren't sure about the best way to go about it. Thousands have quit for good with our help and studies show that you're up to four times more likely to successfully quit with a combination of stop smoking medicine and support from us.

## WHAT TO EXPECT

An experienced Stop Smoking Advisor can help you to decide which support is right for you. Perhaps you'd like telephone support, or have face to face appointments? Or maybe visiting your local pharmacy or GP would suit you better?

Your first appointment will be about tailoring a smokefree plan to suit you. Your advisor will discuss a range of stop smoking medicines available and help you to decide a quit date.

## KEEPING YOU ON TRACK

After quitting, the sessions will help you to manage your cravings and/or withdrawal symptoms, and you can also check your carbon monoxide levels to show how much progress you're making. You'll also be given useful tips on coping with 'triggers' and support to help you avoid a relapse.

## STOP SMOKING AIDS

Nicotine and other chemicals found in cigarettes makes smokers become dependent and want to smoke frequently. Giving up smoking can cause withdrawal symptoms, which include cravings, headaches, feeling irritable and not being able to sleep.

Stop smoking medicines can help you manage these withdrawal symptoms. They include prescription tablets (Champix and Zyban) and nicotine replacement therapy (NRT) products such as patches, gum, inhalators and nasal sprays.

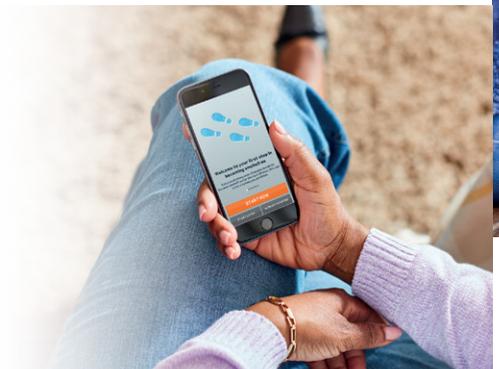

Using an e-cigarette/vape can help you stop smoking and is particularly effective when combined with support from a trained advisor. To get the full benefit, you need to make a complete switch from smoking to vaping.

Your advisor will help you choose the right type to suit you.

## SAVE MONEY

Smoking is expensive and you might be surprised at how it all adds up. On average, most people who quit save around £135 each month.

Smokefree South Gloucestershire can also help to save you money on the range of stop smoking aids.

## KEEPING UP THE GOOD WORK

Once you've quit, you can still rely on us for support. We can give you advice on common triggers and different coping strategies to help you avoid a relapse.

There is also a range of online support available including the Smokefree app which can help keep you focused wherever you are, at whatever time of the day.

## SMOKING IN PREGNANCY

We have a dedicated Stop Smoking Midwife, who can support you at home. Our Midwife will discuss what treatment options are available for you, and ensure you have as much support as possible to help you quit. She can also support a partner or other family members in a quit attempt at the same time. Contact us or ask your Midwife for more information.

No matter what stage you're at in your pregnancy, it's never too late to stop smoking.
